

Q1. Line Plot

Write a Python program to plot a **line graph** showing the monthly sales of a company for 6 months.

Given data:

- Months = Jan, Feb, Mar, Apr, May, Jun
- Sales = 120, 150, 180, 170, 200, 220

Include:

- Title
- X-axis and Y-axis labels
- Grid

Q2. Bar Chart

Write a Python program to create a **bar chart** representing the number of students in different departments:

- CSE: 120
- ECE: 90
- ME: 60
- CE: 50

Add appropriate labels and title.

Q3. Histogram

Write a Python program to plot a **histogram** of marks obtained by students in an exam.

Marks:

[45, 55, 60, 70, 75, 80, 85, 90, 65, 68, 72, 78]

Use:

- 5 bins
- Proper title and axis labels

Q4. Scatter Plot

Write a Python program to draw a **scatter plot** showing the relationship between **hours studied** and **marks obtained**.

Data:

- Hours studied = [1, 2, 3, 4, 5, 6]
- Marks = [35, 40, 50, 65, 75, 85]

Add title and labels.

Q5. Subplots

Write a Python program to create **multiple subplots** in a single figure:

- Subplot 1: Line plot of monthly sales
- Subplot 2: Bar chart of department-wise student strength

Use suitable titles for each subplot.
